

Fund Update for the Britannia Retirement Scheme – Balanced Fund

For the quarter ended 30 September 2017.

This revised Fund Update was first made publicly available on 8 September 2020. It replaces the Fund Update published on 30 October 2017. The change made relates to the investor example.

WHAT IS THE PURPOSE OF THIS UPDATE?

This document tells you how the Balanced Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Britannia Financial Services Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

DESCRIPTION OF THIS FUND

The Balanced Fund is invested with a slightly greater exposure to growth assets, such as Australasian and international equities, than its exposure to income assets, such as cash and fixed interest investments. The Balanced Fund is designed to derive both income and capital growth through a well-diversified portfolio.

Total value of the Fund	\$1,964,410
Number of investors	17
Date the Fund started	1 December 2016

WHAT ARE THE RISKS OF INVESTING?

Risk indicator for the Balanced Fund*

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund’s assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund’s future performance. The risk indicator is based on the market index return from 1 October 2012 to 30 April 2017 and actual fund return data from 1 May 2017 to 30 September 2017. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future Fund Updates. See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

**As the fund was first invested in May 2017 returns from the underlying fund managers (or market indices where the fund managers’ returns were unavailable) for the period to 30 April 2017 have been used for the above risk indicator. The risk indicator may therefore provide a less reliable indicator of the potential future volatility of the fund.*

NOTES

¹ As the fund commenced on 1 December 2016 fee data described in the PDS was used for the fund charges table.

² Total fund charges are an estimated percentage of the value of your unitholding balance in the fund. This estimate is, in part, based on actual annual fees expected to be paid to underlying fund managers and is also based on anticipated investment levels in the fund. Actual charges may vary from the estimates provided.

Estimated total fund charges are exclusive of GST and are made up of the management fee, the underlying fund managers' fees and other administration fees, which are accrued on a daily basis and reflected in the unit price of the fund. Total fund charges comprise:

- management fees, which are paid to Britannia for the management of the fund's assets;
- underlying managers' fees and expenses (including any performance fees of their underlying funds), which are estimated and paid to the underlying fund managers for their management services; and
- other administration fees, which include the Supervisor's fee, the Custodian's fee, the Administration Manager's fees (for registry, valuation and unit pricing services), and the estimated accounting expenses of the fund.

The Manager may also charge reasonable auditing and other professional services charges to the fund in the future. Currently the Manager does not charge these fees to the fund, so the estimated fee for these professional services is nil.
